Cancún, México, Q.R. CP 77515

On behalf of the American Association of Petroleum Geologists, I offer my sincere gratitude to Grupo Regio for outstanding service in printing the conference program books and supplementary materials for our 2004 International Conference and Exhibition in Cancun October 24-27. The conference was a tremendous success, and your contributions toward this success have been greatly appreciated.

Working with such a skilled and courteous group was truly a pleasure. I was impressed by the professional manner in which our account was handled and by the staff members' obvious quality of work and printing expertise. The final product was created exactly to my specifications without a single concern, problem, or delay. If presented with the opportunity, I would gladly and confidently entrust future printing jobs to Grupo Regio and your very capable employees.

Please extend our compliments to all of the staff, and especially to Luis Miguel Martínez, the representative who saw this project through from the first bid to the final delivery. His attentive service facilitated the task of producing and printing our 88-page conference program book, and his positive and professional attitude proved to me from the beginning that Grupo Regio was the right printer for this job. He went far beyond the call of duty to personally make sure that every detail was perfect for our program books. Mr. Martínez takes great pride in his work and in his company, and I am grateful for the many ways that he made sure the production process ran smoothly.

Again, thanks to all of you at Grupo Regio for a job well done. I wish you success in all of your future endeavors.

Sincerely,

Crystal Garvin
Publications Coordinator
